

Small Goods. Big Profits.

Measurement Capacity: 0.5mm to 4.5mm

Per Day Production: 1000 to 1200 stones

Profit in Cartage Optimization: 3% to 10% increase

Make this logic right with **LITE.**

Out of the 10 polished diamonds in the world, 9 are processed in India. Out of those 9 diamonds 8 are said to be of smaller lot. Industry right now, earns maximum from small goods. This calls for technology that provides least scope of loss in carats or value. And when it comes from technology provider nearest to you since last one & half decade, the logic said above seems quite obvious.

Sahajanand presents you; Magnus LITE - the planner specially engineered for small goods. Packaged with all facilities & features necessary to enhance value of small goods. It provides laser mapping that accurately captures cavities, user friendly Magnus Rough software for best value yielding plan & laser marking with optimum speed. Call **9925200210** and make the logic work.

Features:

- Planning for sawable, makeable & other complicated stones
- Normal & Concavity mapping facility
- Advanced planning facility through 3D visual simulation
- Computer assisted manual planning
- Industry standard round, fancy & other customized shapes
- Laser guideline marking for sawing / cutting & any part of polished stone
- Multiple selection levels for marking contrast, speed & pattern

Specifications:

- Stone Size: 0.5mm to 4.5mm
- Computer Requirement: Pentium IV, 512MB RAM, Windows 2000/XP
- Dimensions(mm): 540 x 270 x 364
- Weight: 20.980Kg
